Why Choose Us?

Glendining Signs are industry leaders within the construction signage marketplace, with over 40 years experience. Operating from our 16000+sq ft bespoke manufacturing facility we invest in the latest print and manufacturing technology to produce high quality products for many of the UK's biggest house builders and construction companies. We have built a reputation for excellent service and reliability, helping our valued customers meet commitments and deadlines on time.

We are a responsible and ethical Carbon Neutral business with recognised accreditations demonstrating the high standards that we are committed to. We carry the Build UK Common Assessment Standard (CAS) certification as a supplier to the Construction Industry, so you can be sure you are working with a company that meets your industry's standards. On top of this we also hold the Safety Schemes in Procurement (SSIP) certification to demonstrate our commitment to occupational health and safety standards within our organisation. Pre-qualification to work with us is simple with these unified standards in place to ensure compliance and satisfaction.

The CAS accreditation is shared across multiple membership platforms to demonstrate our compliance:

Glendining Signs are proud to be recognised as a gold member of the Supply Chain Sustainability School.

We are also a Disability Confident Committed business, ensuring employment opportunities are accessible to all, and offer additional support to those who may need it. Taking this one step further we have trained many of our staff to support physical and mental health awareness with recognised and certified courses above and beyond any legal requirement. You can be confident that a choice to work with Glendining Signs is a choice to do things right! We are committed to the highest standards to meet your needs.

We are ready and waiting to help you!

Making Sustainable Choices

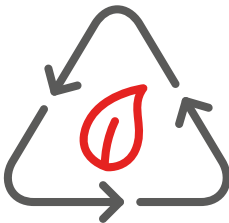

Sustainability is at the core of our business choices. We understand the needs of our customers and work hard to ensure we can provide the right products and services whilst upholding our own sustainability values. These are values that we know you share with us and play an important part in the business relationships within your supply chain.

Sustainable

Signage Materials

We have replaced many of our sign materials with PVC free alternatives without compromising on quality, recycling all sign material wastage where possible.

99%

of all single use plastic packaging removed

We have undergone a programme to remove 99% of single use plastic packaging materials from our daily operation, removing over 8 tonnes of plastic waste, and replacing it with recycled packaging card.

82%

energy reduction in printing using LED lamps

Investing in new print equipment utilising LED cold cure technology has reduced energy consumption up to 82% vs UV printers with conventional mercury lamps.

Multi-drop

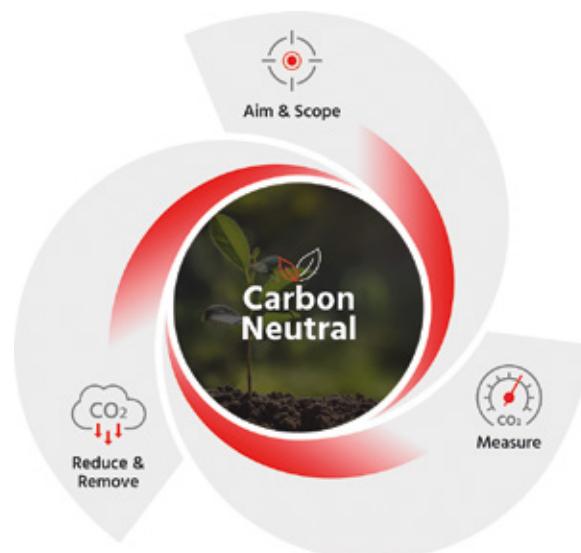

Carrier Network

We employ a third-party carrier to deliver our signage across the nation, reducing the amount of single delivery address routes. The majority of delivery vehicles are less than 3.5t and meet Euro 6 standards for Diesel.

Certified Carbon Neutral Business

Our Journey to Carbon Neutrality

Putting our customers' needs first and providing top-class products and services is at the core of our business. We understand that part of this service needs to be a strong commitment to reducing the negative environmental impact our operation is responsible for. To accomplish this and take responsibility, we decided in 2023 to begin our journey towards Carbon Neutrality. This was achieved just 1 year later in January 2024.

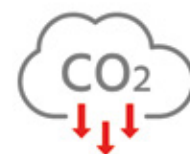

Aim

Carbon neutrality is defined as a balance between the amount of carbon emissions released into the atmosphere and the amount removed or offset. A carbon-neutral state would be achieved when all the emissions associated with an entity's activities are effectively zero, or balanced.

Measure

Current Emissions Reporting
Reporting Year: 2024 (Year 2)
Scope 1 9.4 (tCO2e)
Scope 2 29.8 (tCO2e)
Scope 3 110 (tCO2e)
Total Emissions 149.37 (tCO2e)

Reduce & Remove Emissions

Throughout the period of measured emissions, we identified opportunities for emissions to be reduced Either by putting new initiatives into place or continuing existing projects.

Why Choose

100% RECYCLED

NEW

CorriGlen®

100% RECYCLABLE

Sustainable Material

Made from recycled polypropylene

Identical Performance

It performs the same as other virgin corrugated polypropylene products on the market

Waste Collection

We are able to collect your waste signage and have it recycled again in a circular economy

What is CorriGlen?

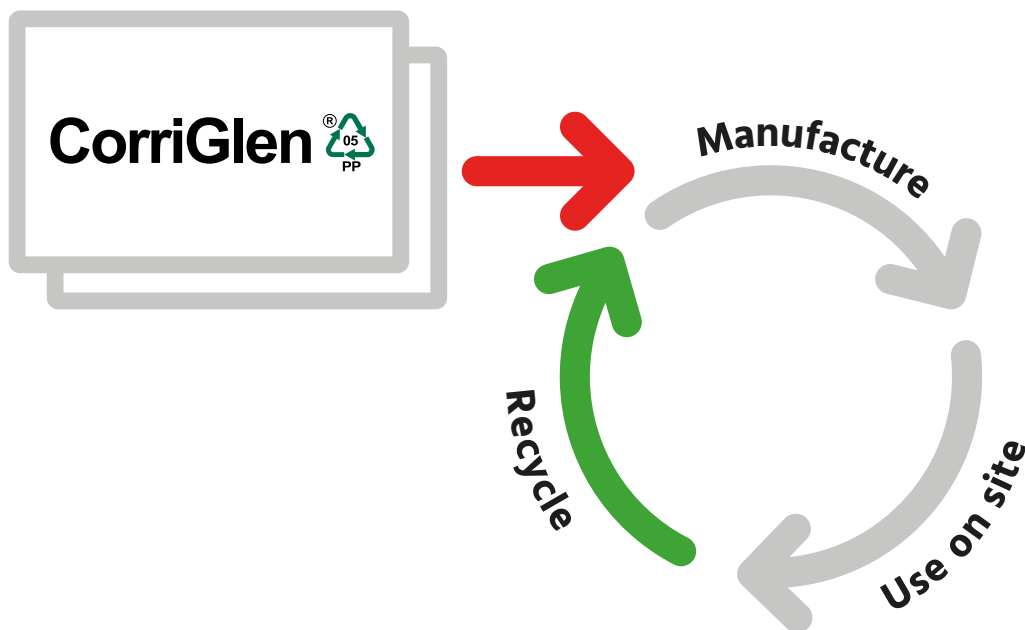

CorriGlen is manufactured from end-of-life polypropylene shipping layer pads. The layer pads themselves are already made from recycled pre-consumer waste (offcuts and trimmings of virgin polypropylene). CorriGlen is a fully recycled product that performs identically to other virgin corrugated polypropylene products on the market. The signature white face and grey back is achieved by using a mixture of white, clear and coloured layer pad shipping waste. The clear and white pads are separated from the colours to achieve the colour split in a manufacturing process specifically designed to produce our CorriGlen fluted polypropylene sign board, perfect for printing and available exclusively from Glendining Signs.

That's only half the story!

We then print your designs on the boards and ship them to your sites to meet your requirements, all the time maintaining our commitment to our exceptional business practices and Carbon Neutral status.

Still not convinced?

When you are finished with your CorriGlen signs, we can recycle them for you. Working with our recycling partners, we are able to take your waste CorriGlen signage and have it recycled again in a circular economy.

If you needed any other reason to make the switch, you can add the fact that CorriGlen is competitively priced, durable and readily available. That's a combination that doesn't come along very often!

To find out more about CorriGlen, exclusively available from Glendining Signs, please call 0118 932 3788 or email sales@glendining.co.uk.

Adding Social Value

As a Disability Confident Committed employer, we are proud to support our employees when they need us. As an inclusive employer, we are committed to improving how we recruit, retain, and develop disabled people.

In the November of 2021, I had what I can only describe as a lifealtering experience. For the second time in my life I had what is called an optic neuropathy episode. It resulted in a loss of vision meaning I was now classified as "severely partially sighted" (Well that's the medical term).

I'm not actually blind, but my vision is very limited. This changed everything, I could no longer read properly, I couldn't drive and had to surrender my driving Licence. Initially I wasn't sure that I would be able to continue working! My hobbies of cycling and riding motorbikes were also stolen from me.

I found myself feeling anxious when leaving the house, and even when the episode had stabilised and I had appropriate spectacles, getting around generally and going into the office was a serious challenge. What was only a 10-15 minute drive to the office, became an hour or so commute by public transport, this all really took a toll on my mental health!

What was great however, is that Glendining Signs recognised I was struggling and gave me a great deal of support. I was set up in the office with larger computer monitors and alternative ways of working were provided. Although I had never really considered working from home, I had a duplicate set up provided there, so as I didn't have to travel as much.

Although I believe that Glendining Signs has always been an inclusive business, now having a disability myself has been a real eye opener (no pun intended). Having gained confidence again and using the available technologies, I feel I bring benefits and experience to the company that could have been lost.

We continue to strive for excellence providing strong FIR (Fairness Inclusion & Respect) values and equity in employment for people who need additional considerations and support. We strongly believe this is a great benefit to both our business and the community as a whole.

Create Your Own Signs

We'll work with you to create your own bespoke signs, using either our pre-designed templates or something completely bespoke to you.

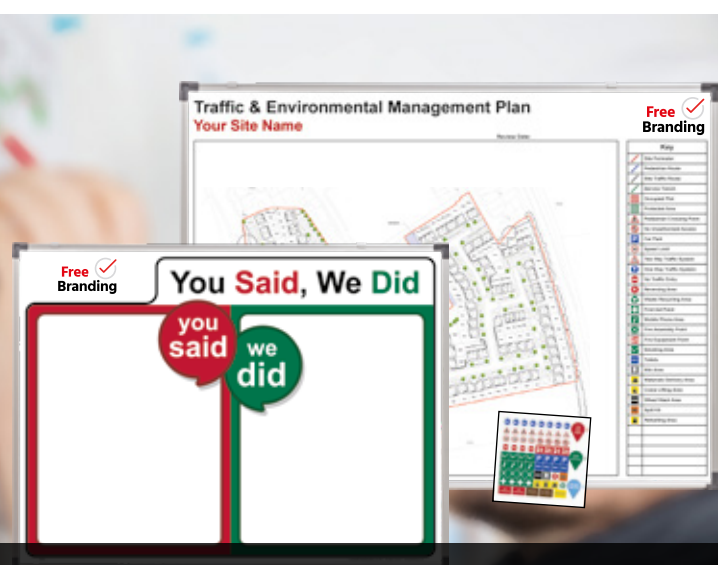

Product Showcase

At Glendining Signs, we believe that exceptional quality and environmental stewardship go hand in hand. Our extensive range of eco-friendly signage materials ensures that you receive durable, high-visibility signs without compromising on sustainability.

Site Signs

Our temporary construction signs are perfect for building sites due to their durable and robust attributes - ideal for house builders, demolition sites, scaffolders, and general builders.

Dry Wipe Boards

Large dry wipe boards are great for displaying essential information at key points of your site and in site offices. These great value markable site signs are a must for any building site.

Large Entrance boards

These large signs are designed for maximum visibility, with bold fonts and clear messaging that can be read from a distance. They can act as welcome signs, conveying important site information and set the stage for a positive site experience.

Signs Stands

Freestanding sign frames are a great alternative to normal sign boards – easy to pick up and transport, or put away and store when not in use.

Information Boards

Information signs provide essential details, such as certifications, guidance, or general safety information. They are commonly used on site to ensure everyone can access the information required.

Tapes

Browse our huge range of high-quality tapes for your construction site. Perfect for identifying site tasks or services in your build.

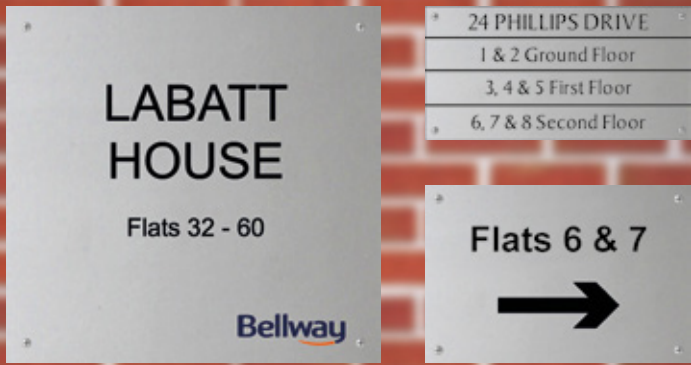

Temporary Road Signs

These high visibility, reflective signs stand out on the roadside, making them perfect for communicating any important temporary traffic instructions, needed for your works.

Hoarding/Banners/Netting & Street Nameplates

Advertise your brand with our range of high quality marketing signs. From premium hoarding signs to site perimeter banners & temporary street nameplates, you'll find exactly what you need for your development.

Engraved Signs

These superior signs are durable and made to order. Manufactured by cutting or etching designs into materials like metal, wood, or plastic, Engraved signs provide a premium look and feel for your messaging.

Helmet Labels

Specialist labels for safety helmets allow for quick identification without harming the hat's material or structural integrity due to the use of water-based adhesive.

Site Ground Markers

Identify and mark out cables, pipes and underground services located around building sites with highly visible, site ground markers.

Wayfinding Signs

Effective wayfinding signage enhances accessibility, reduces confusion, and improves the overall user experience by providing clear and concise information.

Considerate Site Signs

Raise standards on your construction site with our range of Considerate Site Signs. This range of high-quality signs are designed to encourage best practice beyond statutory requirements, focusing on respecting the local community, caring for the environment and valuing your workforce.

Magnetic Signs

Magnetic signs are water resistant, making them suitable for outdoor use, and can be customized in various shapes, sizes, and colors to fit specific branding needs.

Fire Signs

Use these fire exit and fire equipment signs on your site to guide and inform people in the event of an emergency. Also available in Glow in the dark material.

Lecturn Signs

Freestanding external information board. Perfect for displaying maps and other information.

Wooden Noticeboards

Freestanding external notice board. Perfect for displaying posters and notices.

Environmental Signs

Help protect the environment and raise awareness with our range of environmental signage.

Website

At Glendining Signs, we understand the vital role of clear and effective signage on construction sites. That's why we offer a comprehensive range of high-quality construction signage solutions designed to enhance safety, improve communication, and ensure compliance with regulations. Whether you're a contractor, project manager, or site manager, our signage options are tailored to meet your specific needs.

Our Products:

- **Safety Signs:** Keep your site safe with a variety of warning, caution, and informative signs that adhere to regulatory standards.
- **Custom Signage:** Personalize your signs to feature your company's branding, project details, or specific safety messages.
- **Temporary and Permanent Signs:** Choose from durable materials that can withstand the elements, ensuring your signage remains effective throughout the project.
- **Banners and Flags:** Promote your project or communicate important information with eye-catching banners and flags

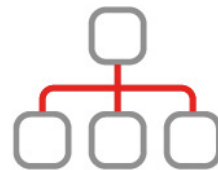

The Trade Portal

The most efficient way to order is via our Trade Portal, specifically designed for our customers needs. Designed to enhance efficiency and simplify management, our trade account portal provides full branding, customisable orders, dedicated support, and purchasing control, all tailored to your business.

What They Say

”

We at Vistry (formerly Bovis) are extremely proud of the long-standing relationship we've forged with Glendining over many years. A relationship that has only strengthened in recent years in particular with the obstacles and volatility within the construction sector. With the changes within our own business this past 3 years as well, Glendining have continued to prove a staunch and reliable partner to the Vistry business as we continue to navigate the unpredictable market we find ourselves in. The service they provide our business and quality of product is very much aligned with our own very high standards set.

Group Procurement Manager, Vistry Group

”

For many years, Persimmon Homes have relied on Glendining Signs to supply general site and health & safety signage items. They are efficient, cost effective, and provide timely deliveries. During the process of refreshing our standard signage range, Glendining's team understood the requirements and delivered a new catalogue to be used across the UK on our various projects. In addition to the new catalogue of signs, a standard package was created for each new project, ensuring every site has the necessary signage from the start. This approach saves time for our Site Managers and Buyers by providing a consistent set of required signs for every site. Recently, Glendining Signs informed us that they have started supplying Persimmon Homes with their new CorriGlen material, a 100% recycled polypropylene sign board. It is beneficial to partner with a supplier like Glendining that shares our commitment to sustainability. We anticipate seeing more CorriGlen signs on Persimmon sites in 2025.
